The screenshot shows the JMeter Aggregate Report window. The left sidebar lists test elements including HTTP Header Manager, Gaussian Random Timer, and various test scripts. The main area displays an 'Aggregate Report' for the 'Aggregate Report' name. It includes a table with performance metrics for each element, such as # Samples, Average, Median, 90% Line, Min, Max, Error %, Throughput, and KB/sec. The 'TOTAL' row shows an average of 1765 samples and a throughput of 32.4/sec.
